

NAO

The humanoid bipedal robot

Famous around the world, NAO is a tremendous programming tool, that revolutionizes several industries such as education, health-care, and entertainment.

NAO is a programmable and handy robot, integrated with a world of cutting-edge technologies, making it one of the sought-after robotics software products.

This little robot is an interactive humanoid. With his big eyes and surprised expression, NAO acts like a robot playmate, especially for children and elderly.

With friendly gestures and the targeted use of music, NAO can provide motivation for fitness and rehabilitation exercises, or make time spent in a waiting room more interesting.
